In 2003, Elmhurst’s police, fire and municipal pension funds already faced a shortfall of $28.4 million. That meant every Elmhurst household, on average, was on the hook for $1,810 in future taxes just to eliminate that shortfall.

Elmhurst began contributing more money – taxpayer dollars – to pensions in an attempt to make the plans healthier. Over the next 16 years, city contributions increasingly crowded out spending for public safety, roads and other core services.

Despite the ramp-up in city payments over those 16 years, Elmhurst’s pension debts didn’t decrease. Instead, they jumped by 2.8 times!

By 2019, the shortfall in Elmhurst’s police, fire and municipal pension funds totaled $79.8 million. That means each Elmhurst household, on average, is now on the hook for $4,922 in debt.

Everyone loses under Elmhurst’s pension crisis:

**Taxpayers are tapped out**

Elmhurst residents are paying more and more into a broken system. City taxpayers in 2019 contributed 3.6 times more to pensions than in 2003, yet city debts are 2.8 times larger.

**Pension costs are devouring the city’s budget**

Elmhurst pension contributions have grown to consume 14.0% of the city’s budget, up from 6.8% in 2003. That’s crowded out spending on public safety, roads and other core services.

**Elmhurst worker retirement security is collapsing**

The health of Elmhurst’s local pension plans have worsened despite those increased taxpayer contributions. In 2003, the plans had 72.6% of the money they needed. By 2019, that had dropped to just 65.6%.

**Elmhurst’s crisis will only get worse**

Elmhurst has fewer active government workers available to help pay for a growing number of retirees. In 2003, there were 1.19 active workers for every pensioner. By 2019, there were 0.82 active workers per pensioner.
Elmhurst received a “D” grade for its local pension crisis
Local officials handcuffed by state pension mandates.

Wirepoints quantified the negative impact of local pensions by examining the finances of Illinois’ 175 largest cities from 2003 to 2019. The analysis was based on ten equally-weighted metrics. Cities were given an A through F grade based on a 100-point scale (10 points per metric).*

Elmhurst was one of 64 cities to receive a “D” grade in 2019. The city’s total score dropped from 71 in 2003 to 63 in 2019, a decline of 8 points.

Elmhurst receives a “D” grade for its local pension crisis
